

We design and build (semi-) automatic machines and lines for the manufacturing of pallets, crates, timber frame construction, furniture, garden etc. We start from a basic machine concept with the possibility of adding extra automation modules. This makes your machine at the desired degree of automation and it also fits perfectly into your budget.

↗ PRODUCTION	↗ QUALITY
↗ SAFETY	↘ COSTS

Handsaeme Machinery has over 80 years of experience (+35 years in automation & carpets and textile machinery and +10 years in industrial wood nailing machinery).

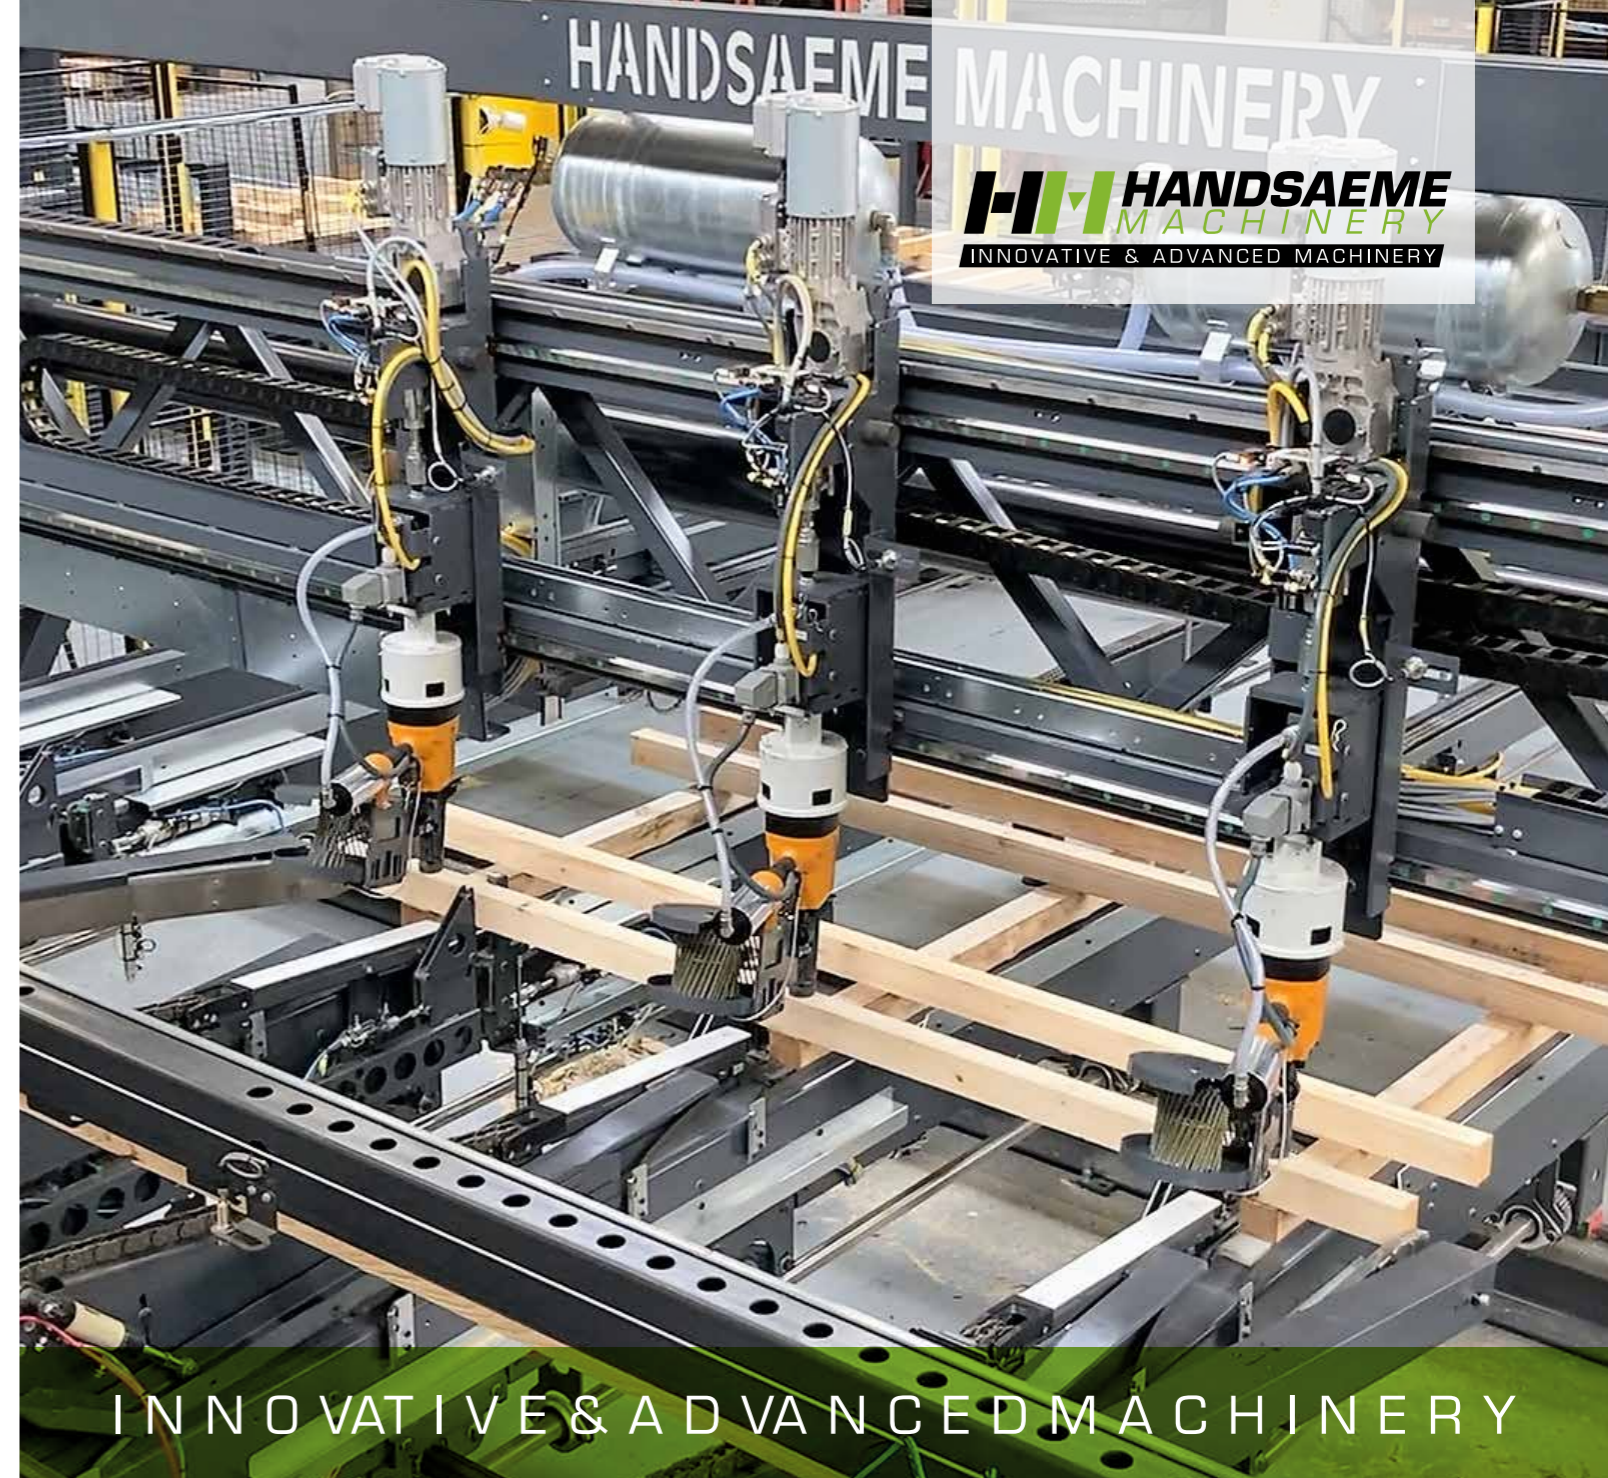

**+ 2000 customers
in 49 countries!**
